### **DETAILED ACTION**

Claims 1, 2, 4 and 6 have been amended. Claims 7-16 have been added. Claims 1, 4-16 are pending and under consideration.

Priority has been extended to 60/176,515 for claims 1, 2, 4-11 which are limited to doxorubicin, Taxol<sup>TM</sup>, Herceptin<sup>TM</sup> and the detection of SA-B-Gal, and p21. Claims 12-16 will have an effective priority date of 1/12/2001 because neither of the provisional applications disclose the detection of p16 or p27 expression.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 9 and 12 encompass a chemotherapeutic agent which is a topoisomerase inhibitor. Claims 10, 11 and 13 identify said topoisomerase inhibitor as doxorubicin. It is noted that the prior art teaches that doxorubicin is an anti-tumor antibiotic and that the mechanism of action is one of inhibiting DNA dependent RNA synthesis and to delay or inhibit mitosis (Cada et al Ed.s, Drug Facts and Comparisons, 1999, page 3283) which is not commensurate in scope with a topoisomerase inhibitor. The originally filed disclosure contemplates the chemotherapeutic agent of doxorubicin, there is no disclosure that doxorubicin is a topoisomerase inhibitor, or that the invention encompasses topoisomerase inhibitors as a class of compounds. One of skill in the art would reasonably conclude that applicant was not in possession of the claimed invention.

All other rejections and objections as set forth or maintained in a prior Office action are withdrawn.

Claims 1 and 4-8 are free of the art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
